DETAILED ACTION

Response to Amendment

1. This communication is responsive to the amendment filed on 9/20/06.
Accordingly, claims 1-61 are currently pending in this application.

Claim Objections

1. Claims 1-4,6,12,13,15,27,30,32,33,36,42,43,57,58 and 61 are objected to because of the following informalities: Use of the term "configured to" makes the claim limitation following the term optional, and does not require the steps to be performed. Refer to MPEP 2111.04 and 2106 C. Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 31 are rejected under 35 U.S.C. 102(e) as being anticipated by Pershan et al. (US 7,050,558).

Regarding claims 1 and 31, Pershan teaches a system for providing integrated control of at least one transport resource provided by at least one communication network

Art Unit: 2616

service provider comprising: at least one Association Controller (AC) (Fig. 1; OSN 34) that operates in a transport control layer (col. 6, lines 17-24) and is connectable to a plurality of communications networks so as to communicate with system entities (Fig. 1; col. 6, lines 17-24), wherein the at least one AC is configured to dynamically receive an event registration list (ERL) (col. 6, lines 3-11; event list/trigger set), which includes at least one event, through an interactive exchange of one or more commands with an integrated services controller (ISC) (ISCP 16) associated with the at least one AC (col. 6, lines 3-11, 20-24), registering one or more events from the one or more communication services which have a notification interest in said events (col. 6, lines 32-41).

Allowable Subject Matter

4. Claims 3-6, 9-30, 33-36 and 39-61 are allowed.
5. Claims 2, 7, 8, 32, 37 and 38 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 1 and 31 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
